

Disassembling VTech MobiGo Touch Learning System Screen Enclosure

Disassemble the screen enclosure of the VTech MobiGo Touch Learning System.

Written By: Daniel Kresge

INTRODUCTION

The VTech has two cases. The main case housing the main circuit board and other components and a smaller enclosure that houses the screen and two buttons. This guide is how to disassemble the Vtech to gain access to the screen and button components.

TOOLS:

- [Screwdriver](#) (1)
 - [iFixit Opening Tools](#) (1)
 - [Magnetic Project Mat](#) (1)
-

Step 1 — Case

- Remove the battery covers and the four batteries.

Step 2

- Remove the four plastic caps with a metal spudger to expose the 6.0 mm Philips JIS #0 case screws.
- Remove the eight 6.0 mm JIS #0 case screws.

Step 3

- Using a plastic opening tool, separate the two pieces of the case carefully.

Step 4 — Disassembling VTech MobiGo Touch Learning System Screen Enclosure

- Remove the three 4.0 mm Philips J0 screws holding the "L" shaped brackets in place.

Step 5

- Remove the three "L" shaped brackets and the spring.

Step 6

- Flip the device over and remove the three 4.0 mm Philips J0 case screws.

Step 7

- Separate the front and back of the case.
- ⓘ Use a plastic opening tool if necessary.

To reassemble your device, follow these instructions in reverse order.
